DETAILED ACTION

Page 2

1. Claims 26-to-36 are pending in the application.

2. Claims 1-to-25 have been canceled.

Allowable Subject Matter

3. Claims 26-to-36 and re-numbered as claims 1-to-11 respectively are allowable over the prior art of record because the cited references do not contain the specified limitation of a method for dynamically inverting an Asymmetric Digital Subscriber Line (ADSL) system comprising a central exchange equipment (CE) connected to a service provider network and a user equipment (UE) connected to a user workstation, wherein said CE and said UE are interconnected by a PSTN. link, said CE including an ADSL transceiver and a splitter coupled between said CE transceiver and said PSTN link, said CE splitter including a low-pass filter for separating low frequency voice signals from high frequency ADSL signals transmitted from said UE over said PSTN link, said method comprising: generating an invert request message encoded as a tone sequence within said UE and transmitted to said CE over said PSTN link; receiving the tone-encoded invert request through the CE splitter low-pass filter; and decoding the received tone-encoded invert request utilizing a tone decoder communicatively coupled between the CE splitter low-pass filter and said CE transceiver.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sudhanshu C. Pathak whose telephone number is (571)-272-3038. The examiner can normally be reached on M-F: 9am-6pm.

Application/Control Number: 09/755,687
